

A Project Report on
E-Learning Management System
Submitted in partial fulfillment for the award of
Degree In
Computer Science and Engineering

By
SOURAV KUMAR (D/18/CS/105)
AMIT KUMAR (D/18/CS/001)

Under the supervision of
Mr. Yogendra Mohan
(Asst. Professor, Dept. of CSE)

Computer Science and Engineering Department
North Eastern Regional Institute of Science and Technology
Nirjuli, Itanagar, Arunachal Pradesh 791109
Session: 2021 - 2022

CANDIDATES' DECLARATION

This is to certify that the project entitled “**E-Learning Management System**” is pre-requisite project work carried out by us towards partial fulfillment of the award of Degree in Computer Science and Engineering submitted to the Department of Computer Science and Engineering, North Eastern Regional Institute of Science and Technology, Nirjuli, Arunachal Pradesh, under the guidance of **Mr. Yogendra Mohan**, Asst. Professor, Department of Computer Science and Engineering during the academic semester Jan-May'22.

Dated: 16th June, 2022

NORTH EASTERN REGIONAL INSTITUTE OF SCIENCE AND TECHNOLOGY

(Under the Ministry of Human Resource Development, Govt. Of India)

(Deemed To Be University)

Nirjuli-791109

Arunachal Pradesh, India

CERTIFICATE OF APPROVAL

This is to certify that the project report entitled “**E-Learning Management System**” submitted jointly by:

SOURAV KUMAR (D/18/CS/105)

AMIT KUMAR (D/18/CS/001)

In partial fulfillment for the award of the Degree of Bachelor of Technology in Computer Science and Engineering to NORTH EASTERN REGIONAL INSTITUTE OF SCIENCE AND TECHNOLOGY is a record of bonafide work carried out by them under my guidance and supervision. The results embodied in this project report have not been submitted to any other University or Institute for the award of any Degree or Diploma.

Mr. YOGENDRA MOHAN
(Project Guide)

Approved By

DR. MOIRANGTHEM MARJIT SINGH
(Head of Department CSE)

Mr. ASWINI KUMAR PATRA
(Project Coordinator)

Phone: (0360)2257401 – 11(0)
Fax: (0360) 2257872 / 2258533

ACKNOWLEDGEMENT

It is our privilege to express our sincerest regards to our project coordinator, Mr. Aswini Kumar Patra, for his valuable inputs, encouragement, whole-hearted cooperation and constructive guidance throughout the duration of our project.

We deeply express our sincere thanks to our Head of Department, Dr. Moirangthem Marjit Singh and our Project Guide, Mr. Yogendra Mohan for encouraging and allowing us to present the project on the topic “**E-Learning Management System**” at our department premises for the partial fulfillment of the requirements for the award of the Degree of Bachelor of Technology in Computer Science and Engineering.

Last but not the least; we would like to express our feeling of endearment to our parents who always supported us with their encouragement and silent blessing throughout the project period. We are also very thankful to our friends who have directly or indirectly helped us in the successful completion of this project. We would like to express our deep sense of gratitude to all teaching and non-teaching staffs of Computer Science Department, NERIST.

(D/18/CS/001)

ABSTRACT

The reason for E-learning Management System is to mechanize the current manual framework by the assistance of modernized hardware's and undeniable program, satisfying their prerequisites, so their significant information/data can be put away for a more drawn-out period with simple getting to and control of something similar. The necessary programming and equipment are effectively accessible and simple to work with. E-learning Management System, as depicted above, can prompt mistake free, secure, dependable and quick administration framework. It can help the client to focus on their different exercises rather to focus on the record keeping. In this way it will help association in better usage of assets. The association can keep up with modernized records without repetitive passages. That implies that one need not be diverted by data that isn't pertinent, while having the option to arrive at the data.

CHAPTER 1

1.1 Introduction

The "E-Learning Application" is made to annul the issues winning in the practicing manual structure. This item is maintained to kill and on occasion decline the challenges looked by this ongoing system. Other than this structure is expected for the particular need of the association to get done with responsibilities in a clean and feasible manner.

Application is lessened whatever amount as could sensibly be anticipated to avoid screws up when the data entered. It correspondingly gives mishandle message when invalid data is entered. No standard data is assumed for the client to use this development. Thusly, by this all it shows it is not difficult to utilize. E-Learning Application, as depicted above, can incite screw up free, solid areas for secure quick affiliation structure. It can help the client with focusing in on their different exercises rather to focus in on the how the record is kept. It will help to use the resource in better way.

1.2 Features of Android e-learning application

There are various segments for clients, and administrator.

Tutors can join in the application. Tutor can see the rundown of the multitude of courses he has transferred in the application. Mentors can transfer new courses with reasonable titles and classes. Clients who sign in the application can see every one of the courses. The dashboard will have various classes. After the client taps on any class, he will be shown every one of the courses accessible. He can tap on any course and begin learning. Administrator has the ability to see every one of the courses and erase any course.

1.3 Scope of E-learning application

It could help gathering ideal organization in nuances. In a particularly short period of time, the assortment will be self-evident, straightforward and reasonable. It will assist an individual with knowing the administration of spent year flawlessly and distinctively. It likewise helps in current all works comparative with E-learning Application. Our venture focuses on Business process robotization, for example we have attempted to mechanize different cycles of E-learning Application. It will be furthermore diminished the cost of social occasion the organization and combination method will do according to plan.

- In the system, the singular necessities to complete the various designs and total copies of the designs can be helpfully made at a time.
- It isn't vital to make the manifest anyway we can clearly print it, which saves our time.

- It helps staff getting the work spent on their different working locales.
- To involve resources in a capable manner by extending their effectiveness through robotization.
- The system produces sorts of details that are used for many purposes.
- It should satisfy demand of the client.
- Clear with overseer demand.
- Easy to work with UI.
- Totally finished time reasonable.

1.4 Module E-learning Application

Focus Modules:

Registration: -

In this, first the intrigued understudies get enlisted by choosing their particular user-id and secret key and by giving the vital subtleties.

Then, at that point, every client profile will be kept up with which can be altered by the client when wanted.

Every individual will enlist just a single time. Subtleties of every individual alongside their username and secret word is saved for all time in the data set.

Login: -

In the wake of giving the right username and secret phrase the client sign's in to the system framework's landing page. There the client can choose the accessible subjects to additionally find out about them. In the event that client enter wrong username or secret phrase, they block their record impermanent and after some security check they will ready to get to their record.

Landing page: -

In the wake of giving the right username and secret key, the client sign's in to the e-Learning framework's landing page. Around here at the landing page there are numerous decisions for client to learn various dialects like live classes, previous live videos, NCERT solutions and so on.

Client can take following makes a difference: -

- Instructional exercises about the subject.
- View topic about the subject.
- Class-wise NCERT solution.

1.5 Objective

The really level headed behind this venture is to give an easy-to-understand climate to give information and allow everybody an opportunity to learn, regardless of where they are, furnished they register themselves with the framework.

The primary highlights that the framework gives can be utilized, when the enlisted individuals select their intrigued subject & give the test for starter. This assists with laying out steady growing experience. Subsequent to taking this, in light of their degree of skill, they can take accessible instructional exercises, step through web-based examinations and furthermore talk about an issue/point by uploading messages in the conversation discussion. Alongside this they can a likewise take ongoing re-enactments of the most known serious tests.

CHAPTER 2

2.1 Specification:

The equipment and programming ought to be selected cautiously remembering following point:

- User friendly system
- System can hold large data.
- System should have smooth and clean interface.

2.1.1 Hardware Requirements

- Processor: Snapdragon 660 or above
- RAM: 4 GB (minimum)
- Internal Memory: 8 GB (minimum)

2.1.2 Software Requirements

- Operating System: Android only
- Android Version: Android 8 or above

2.2 Prerequisites for the proposed framework:

- System require to store data about new passage of assignment.
- Framework necessities to assist the interior staff with keeping data of student and track down them according to different inquiries.
- Framework need to keep up with amount record.
- Framework store the details of STUDENT.
- Framework has to invigorate and remove record.
- Framework likewise needs an inquiry region.
- It should have a security framework to forestall information.

2.3 Literature Survey

In the wake of concluding which learning the executives' framework to carry out, a continuous issue for numerous in advanced education is the means by which to use it in manners that develop learning and furthermore make an ideal experience for the two understudies and workforce. There has been some exploration concerning involving learning the board frameworks in a manner which advances learning. The arrangement for some learning the executives' frameworks, like the norm of WebCT and Blackboard, frequently goes against these standards and underlines data conveyance instead of genuine learning, (Herrington, Reeves, and Oliver 2005 referred to in Herrington, 2006). Using constructivist standards with a center around bona fide errands, mental authenticity, and willingness to accept some far-fetched situations can assist with working with more open doors for a valid encounter inside a learning the executives framework. Making further advancing inside a learning the board framework presents difficulties inside the on the web climate (Herrington, 2006). More profound learning standards can be used in different ways in a learning the executives' framework, yet frequently workforce should consider new ideas to carry out these methodologies. Virtual visit, conversation sheets and declaration postings all consider the social learning component, empowering connection among staff and understudies. Intuitive tests with prompt criticism work with dynamic realizing where practice and certifiable assignments are underlined. Painstakingly picked hyperlinks to sites let understudies investigate extra data in a relevant manner, coordinating the information into the understudy's reality. Connecting with learning, regarding various gifts in a high test, low danger climate can be accomplished through the utilization of general media instruments and sight and sound. Using the learning the board framework to improve the capacity of understudies to look for answers rapidly can enable them independently and permit them to take control through understudy possessed learning, (Iqbal and Qureshi, 2011).

CHAPTER 3

3.1 Analysis

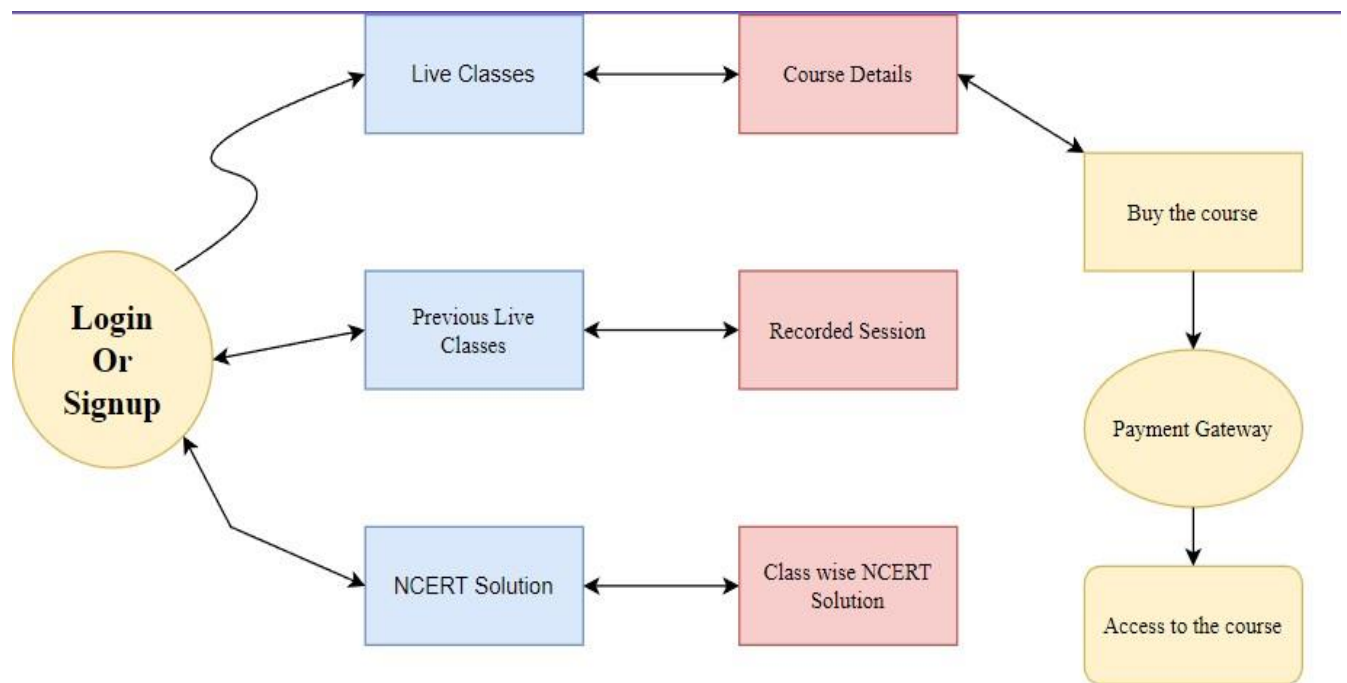

- Step 1: Be clear about the idea you are thinking.
- Step 2: Understand the target audience.
- Step 3: Work to make UI/UX clean and easy.
- Step 4: Think about the most valuable features.
- Step 5: Define monetization feature.

3.2 Design

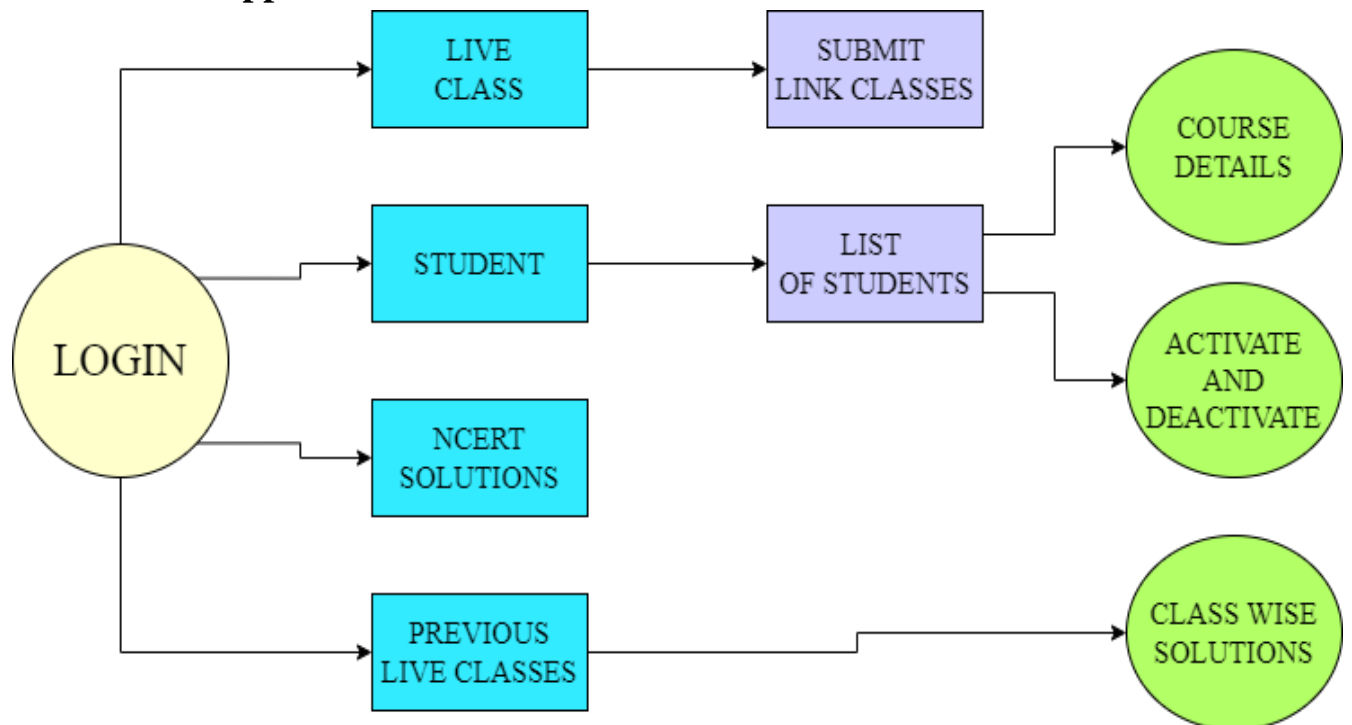

- **Personal Account for Students and Admin:** You need to give the capacity to pursue your e-learning application. The client ought to have the option to fill in the individual data, add Visas, and so on. It is likewise smart to make various points of interaction for students and instructors, as the list of capabilities they need will likewise be unique. For example, instructors ought to have the option to monitor their understudies, installments, progress with every one of them, and so on. Simultaneously, students ought to have an unmistakable timetable of the two classes themselves and installments for them
- **Course System:** The course framework is presumably the most thorough component when you make an E-learning system. Such a framework deals with the entire growing experience. Normally it looks as follows: virtual learning materials are conveyed through intuitive courses to virtual homerooms. The last option, thusly, are incorporated into a portable learning climate. The fundamental objective of the course framework is to smooth out the cycle for educators for more advantageous material creation. With everything that expressed, remember that the comfort of this framework is unequivocal for instructors that pick the application to work with.
- **Connecting Payment Gateways:** Secure installments should be among your needs. In this way, make a point to coordinate secure installment passages (e.g., PayPal, Amazon Pay, Google Pay, and so on) to your e-learning system to make installments helpful and safe.

4.1.1 Student Application

Login & Signup:

The image displays two mobile application screens for a service named 'tutor'. Both screens feature a blue status bar at the top with the time 4:58, battery level 0.00, and various system icons. The left screen is the 'Login' page, showing the 'tutor' logo, a title 'Login', and two input fields for 'Email' and 'Enter Your Password'. A blue 'Login' button is at the bottom. The right screen is the 'Signup' page, showing the 'tutor' logo, a title 'Signup', and three input fields for 'Email', 'Name', and 'Password'. A blue 'Signup' button is at the bottom. Below the Signup screen, there is a link that says 'Already have an account? Login'. At the bottom of the left screen, there is a link that says 'New User? Signup'. The screens are decorated with light blue and purple curved shapes.

Previous Live Class (Recorded Class):

4.1.2 Database

Interface:

The screenshot shows the phpMyAdmin interface. The left sidebar displays the database structure tree with 'u865569740_androidproject' selected. The main panel shows the 'Structure' tab for the selected database. It lists five tables: Eleventhpreviousvideo, Live Classes, Livevideolink, Profile, and Twelfthpreviousvideo. Each table has icons for Browse, Structure, Search, Insert, Empty, and Drop. A summary row at the bottom indicates 5 tables with a total size of 80.0 KiB.

Table	Action	Rows	Type	Collation	Size	Overhead
Eleventhpreviousvideo	Browse Structure Search Insert Empty Drop	3	InnoDB	utf8mb4_unicode_ci	16.0 KiB	-
Live Classes	Browse Structure Search Insert Empty Drop	2	InnoDB	utf8mb4_unicode_ci	16.0 KiB	-
Livevideolink	Browse Structure Search Insert Empty Drop	2	InnoDB	utf8mb4_unicode_ci	16.0 KiB	-
Profile	Browse Structure Search Insert Empty Drop	10	InnoDB	utf8mb4_unicode_ci	16.0 KiB	-
Twelfthpreviousvideo	Browse Structure Search Insert Empty Drop	3	InnoDB	utf8mb4_unicode_ci	16.0 KiB	-
5 tables	Sum	20	InnoDB	utf8mb4_unicode_ci	80.0 KiB	0 B

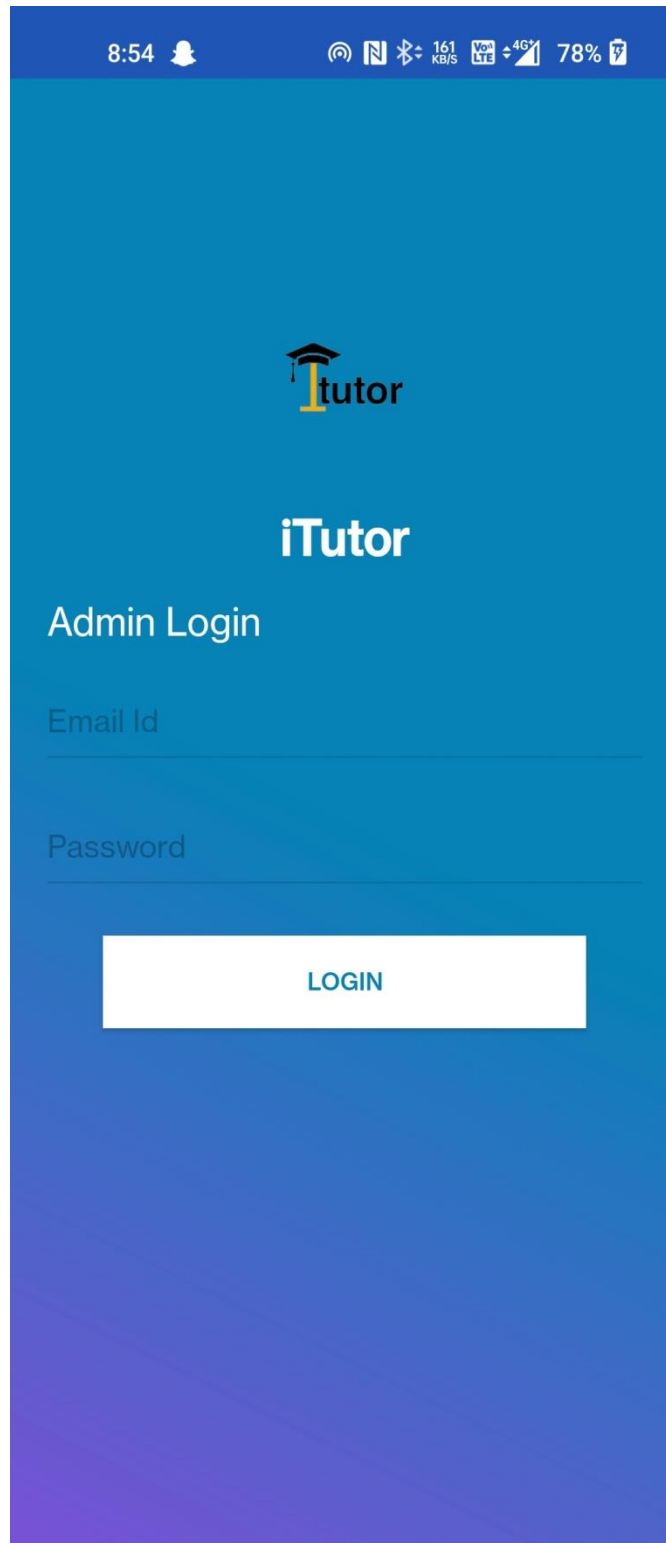

Student List:

The screenshot shows the phpMyAdmin interface with the 'Profile' table selected. The main panel displays the table data. A status bar at the top indicates 'Showing rows 0 - 9 (10 total, Query took 0.0003 seconds.)'. Below the status bar, there is a SQL query editor showing 'SELECT * FROM `Profile`'. The table data is displayed in a grid format with columns: Name, Email, Password, course1, course2, phonenumber, guardian, Gender, city, and class. The data includes 10 rows of student information.

Name	Email	Password	course1	course2	phonenumber	guardian	Gender	city	class
Rohit	rohit.one.4266@gmail	"123456"			0	0	0	0

4.1.3 Admin Portal

Login:

The image shows a mobile application interface for the iTutor Admin Portal. At the top, there is a status bar with the time 8:54, a Snapchat icon, and various system icons including Wi-Fi, Bluetooth, and battery level at 78%. The background is a blue gradient. In the center, there is the iTutor logo, which consists of a graduation cap icon above the word "tutor". Below the logo, the text "iTutor" is displayed in a large, white, sans-serif font. Underneath, the text "Admin Login" is shown in a smaller, white, sans-serif font. There are two input fields: "Email Id" and "Password", both with white text and a light blue underline. Below the input fields is a white rectangular button with the text "LOGIN" in blue, uppercase letters.

CHAPTER 5

5.1 Conclusion

This task assists the scientist with being familiar with the understudies' discernment towards 'e-Learning'. Greater part of the understudies are happy with e-advancing as an instrument for study. The greater part of the understudies are happy with educational experience. They are disappointed with the communication with their instructors and uncertainty clearing. They are additionally exceptionally contradicting to e-discovering that it causes medical issues and expanded mental pressure among understudies. They likewise incorporated that e-learning isn't test cordial and has a ton of network issues which obstruct the regular progression of learning. In any case, notwithstanding of this multitude of impediments, they likewise added that e-learning is extremely useful in submitting of tasks and they are simultaneously conservative and efficient. From the venture it is distinguished, that a large portion of the understudies are happy with e-learning.

5.2 Future Scope

E-learning application isn't simply a difference in innovation. It is significant for a redefinition of how we as creature bunches send data, capacities, and values to additional young periods of workers and students. I will end this book by thinking for even a second to make a couple of expectations of how e-learning application and the capacities it serves will keep on creating.
